EXPERIENCE

Machine Learning/Deep Learning

- Trained and fine-tuned CNN models using popular libraries like FastAI and TensorFlow
- Built, trained and fine-tuned RNNs model using Python libraries like TensorFlow and PyTorch

Data Analytics

- Created data visualizations with Matplotlib and Seaborn to convey insights
- Developed predictive models using scikit-learn and XGBoost for classification and regression

Full Stack Developer

- Front-end experience includes React.js, Next.js, and Vue 3, creating responsive websites using frameworks like Tailwind CSS. Backend servers built with Express.js and experience with both SQL and NoSQL databases. Full stack projects developed with Laravel

Mobile Application Developer

- Created mobile applications with real-time data synchronization and user authentication, integrating Firebase services for seamless backend operations and React Native for cross platform frontend capabilities

EDUCATION

Gyalpozhing College of Information Technology (2020 - 2024)

I pursued Bachelor of Science in Computer Science at Gyalpozhing College of Information Technology.

Peljorling Higher Secondary School (2018 - 2020)

As a high school student, I pursued science with a focus on information technology (IT), which provided me with a solid foundation in both scientific principles and practical technology applications.

SKILLS

- Full Stack Development
- App Development
- Machine Learning
- Deep Learning
- Data Analytics
- Broad-Mindedness
- Resilience
- Confident
- Curious

PROFESSIONAL CERTIFICATES

- Machine Learning
- AWS Academy Graduate
- Google Cybersecurity Certificate
- Google Data Analytics Professional Certificate
- Google Advanced Data Analytics Certificate
- Google Business Intelligence Certificate
